## WHY A NEW EXTENSION?

- Worn out technical systems
- Not possible to rebuild during operation
- New treatment models with higher demands on floor-to-floor height
- New ways of working

1972

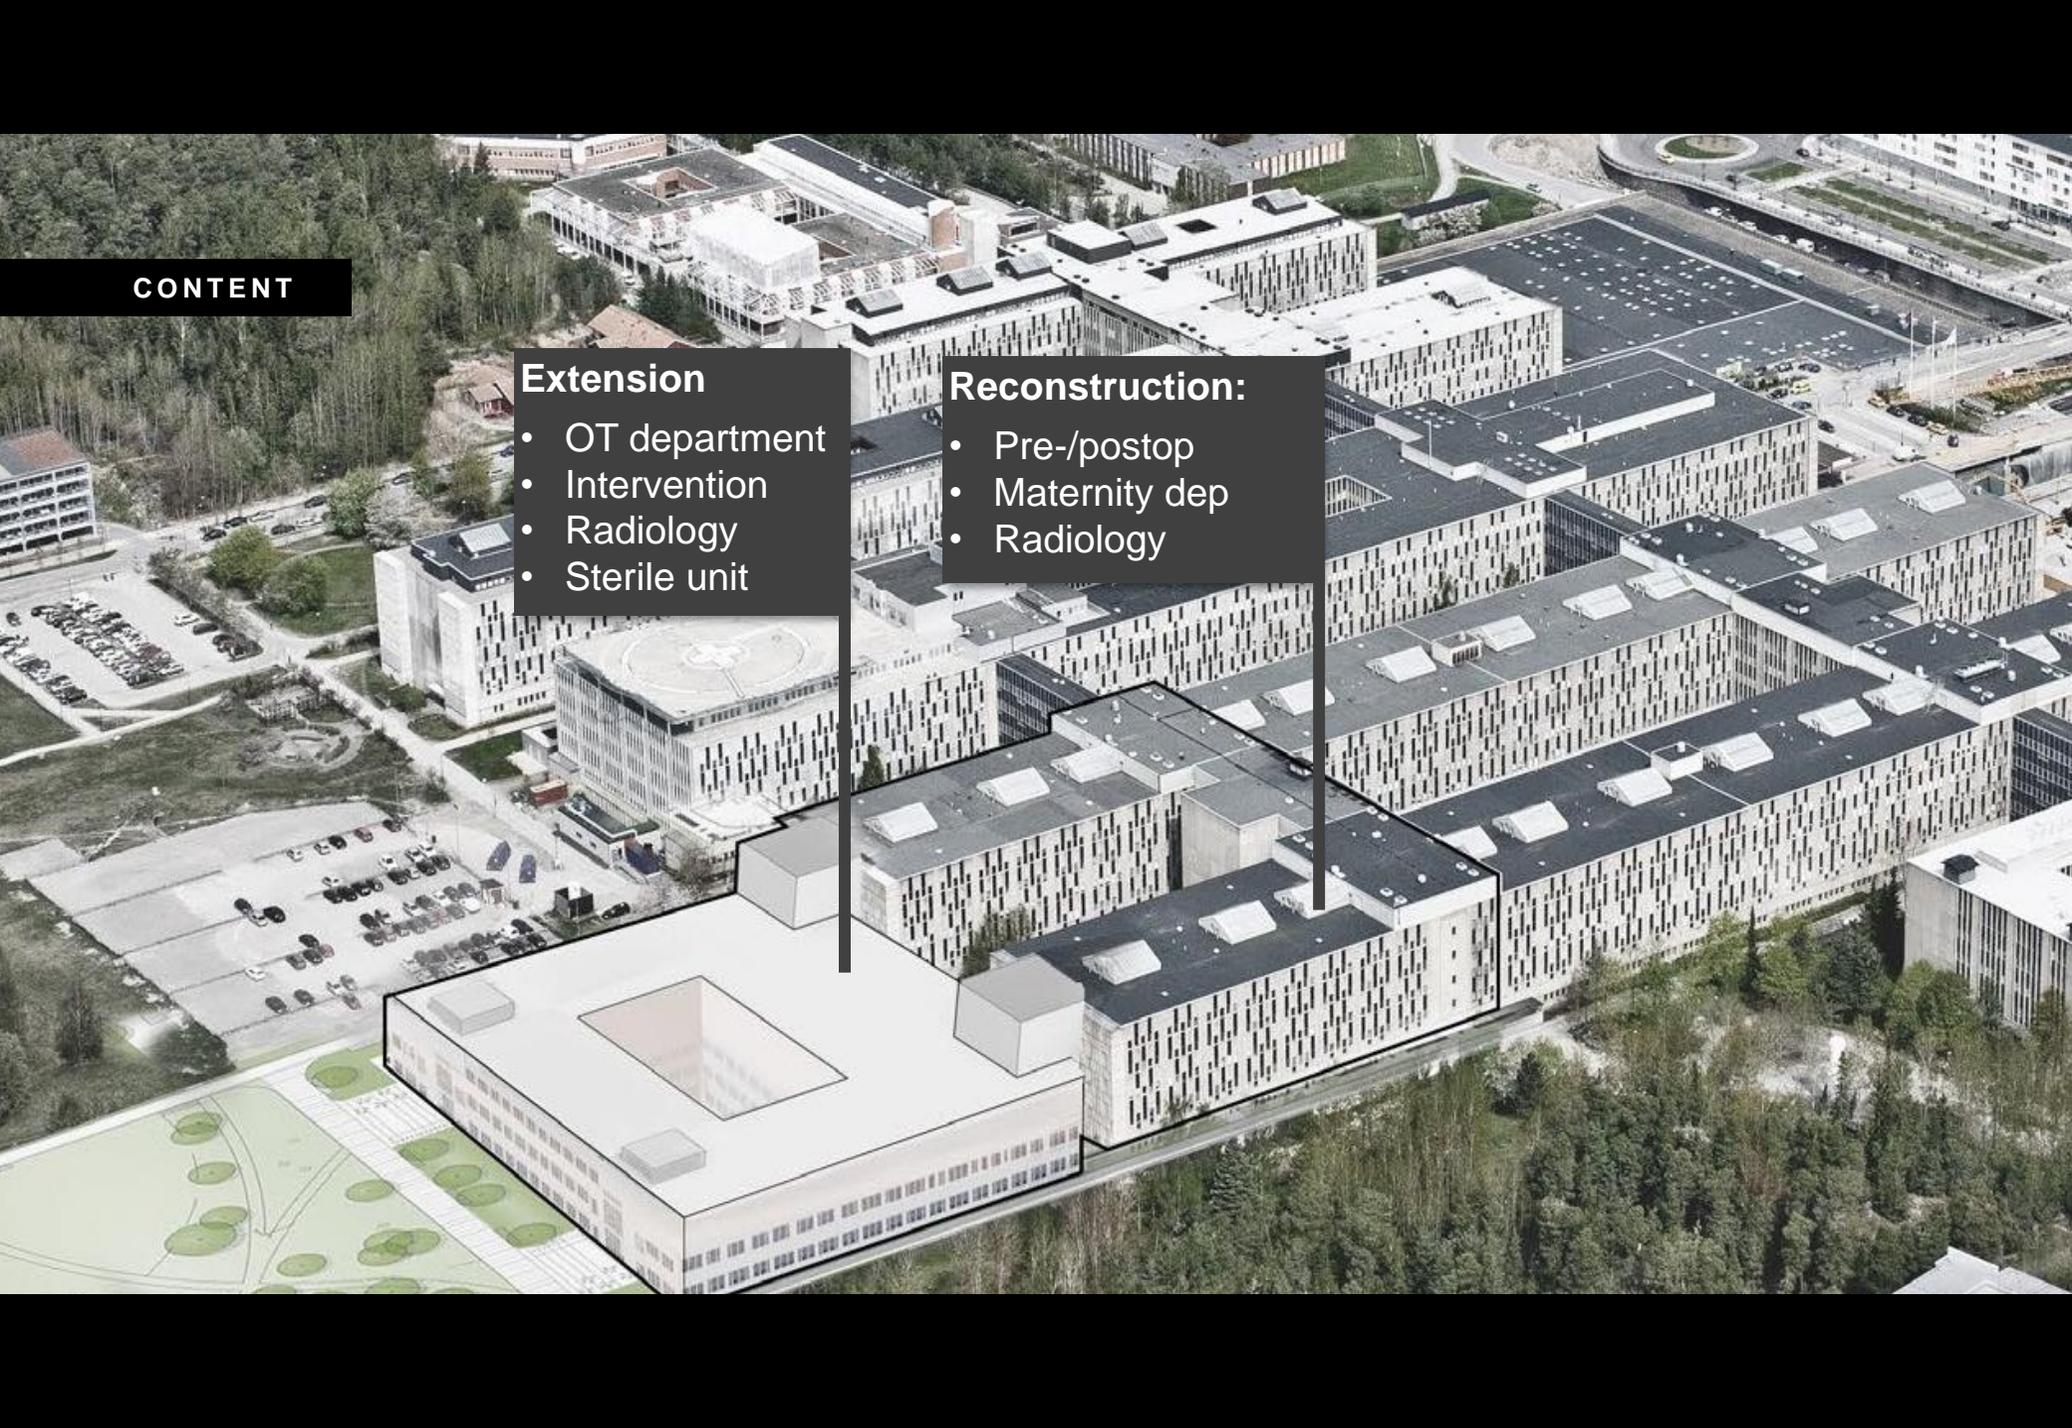

2012

2020

An aerial photograph of a large hospital complex. The main building is a long, multi-story structure with a distinctive facade of vertical slats. A large, light-colored rectangular area is overlaid on the front of the building, representing a new extension. Two callout boxes with black backgrounds and white text are positioned over the building. The background shows other hospital buildings, parking lots, and surrounding greenery.

## CONTENT

### Extension

- OT department
- Intervention
- Radiology
- Sterile unit

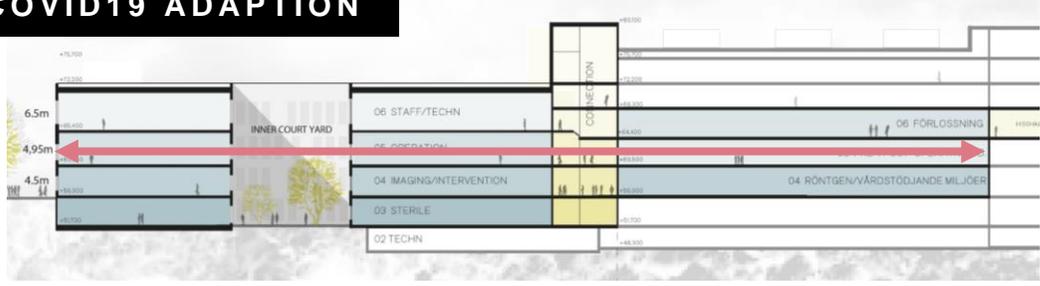

### Reconstruction:

- Pre-/postop
- Maternity dep
- Radiology

## DESIGN QUALITIES

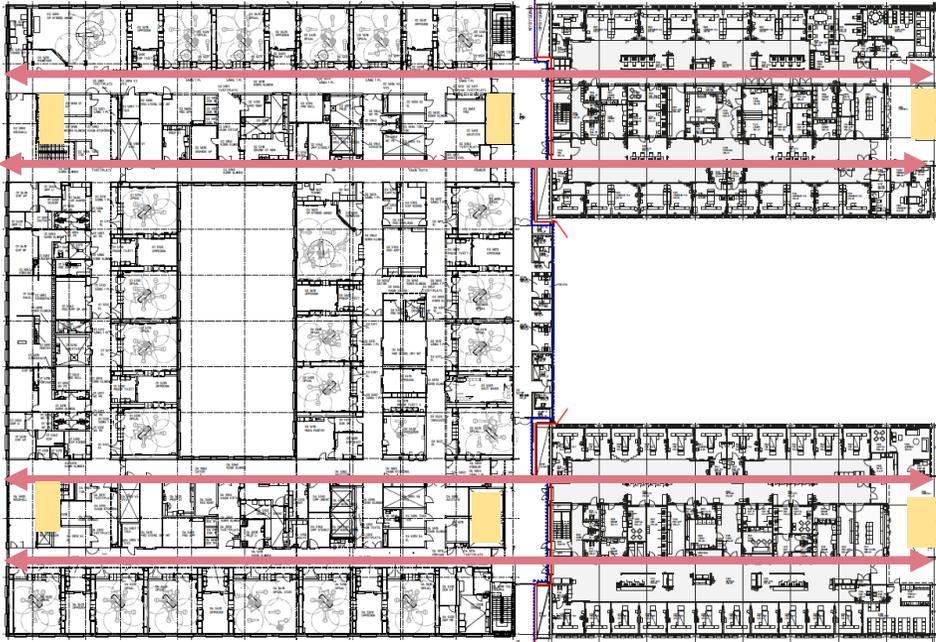

# COVID19 ADAPTION

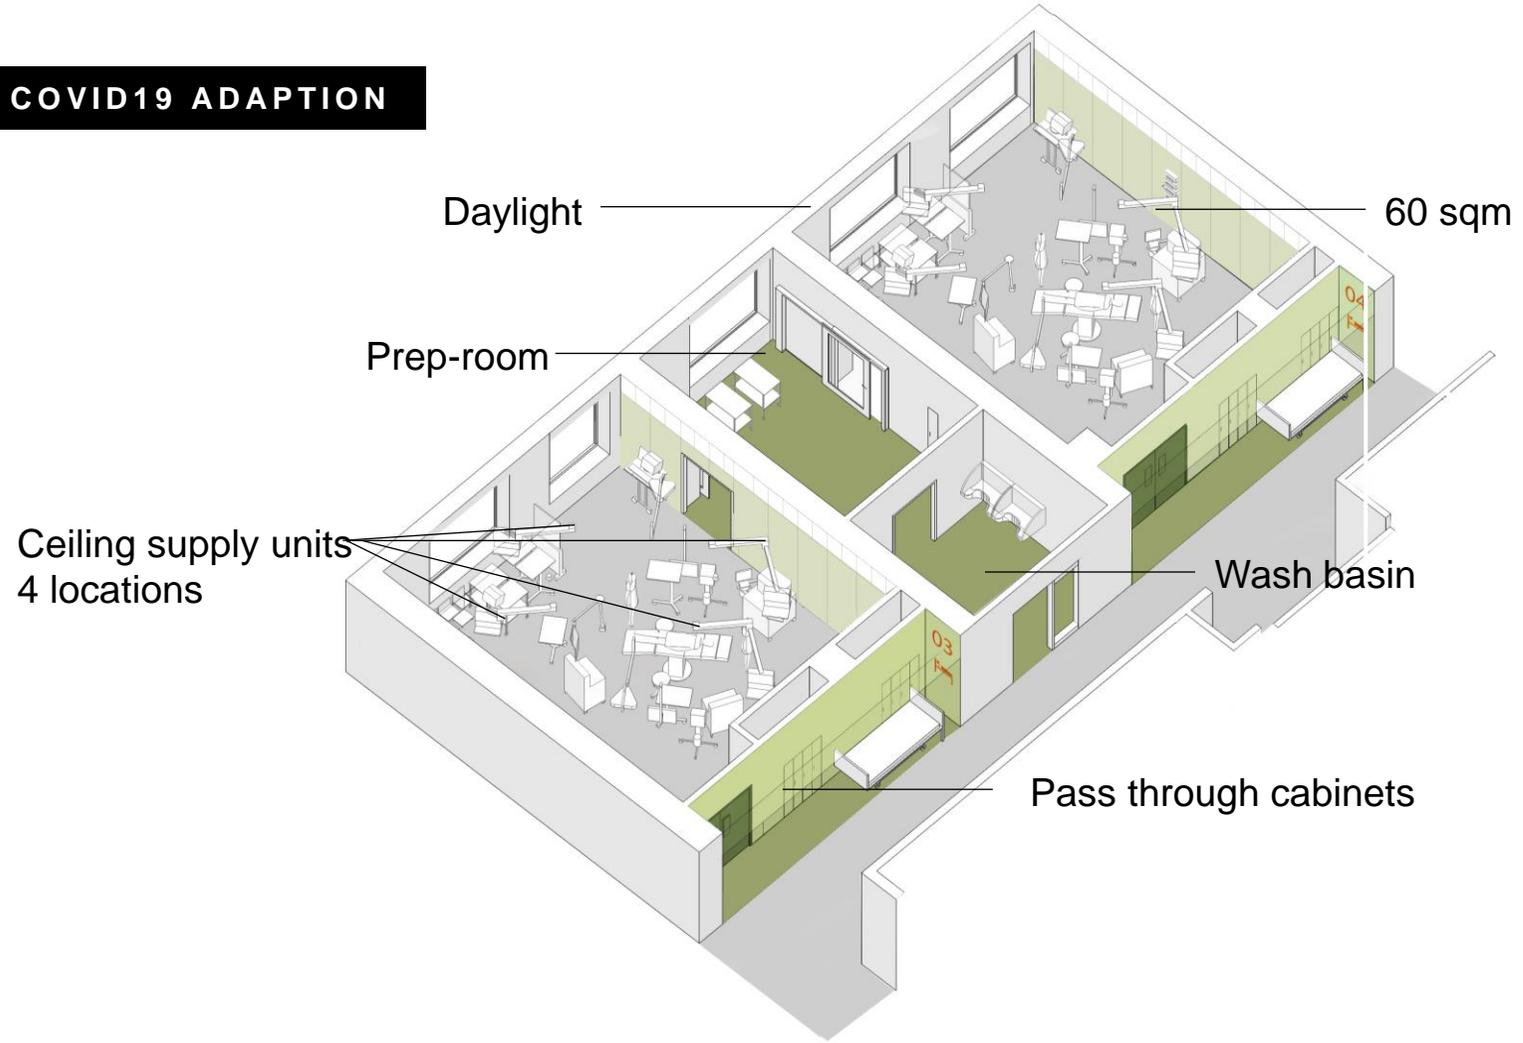

23 Operation Theatres

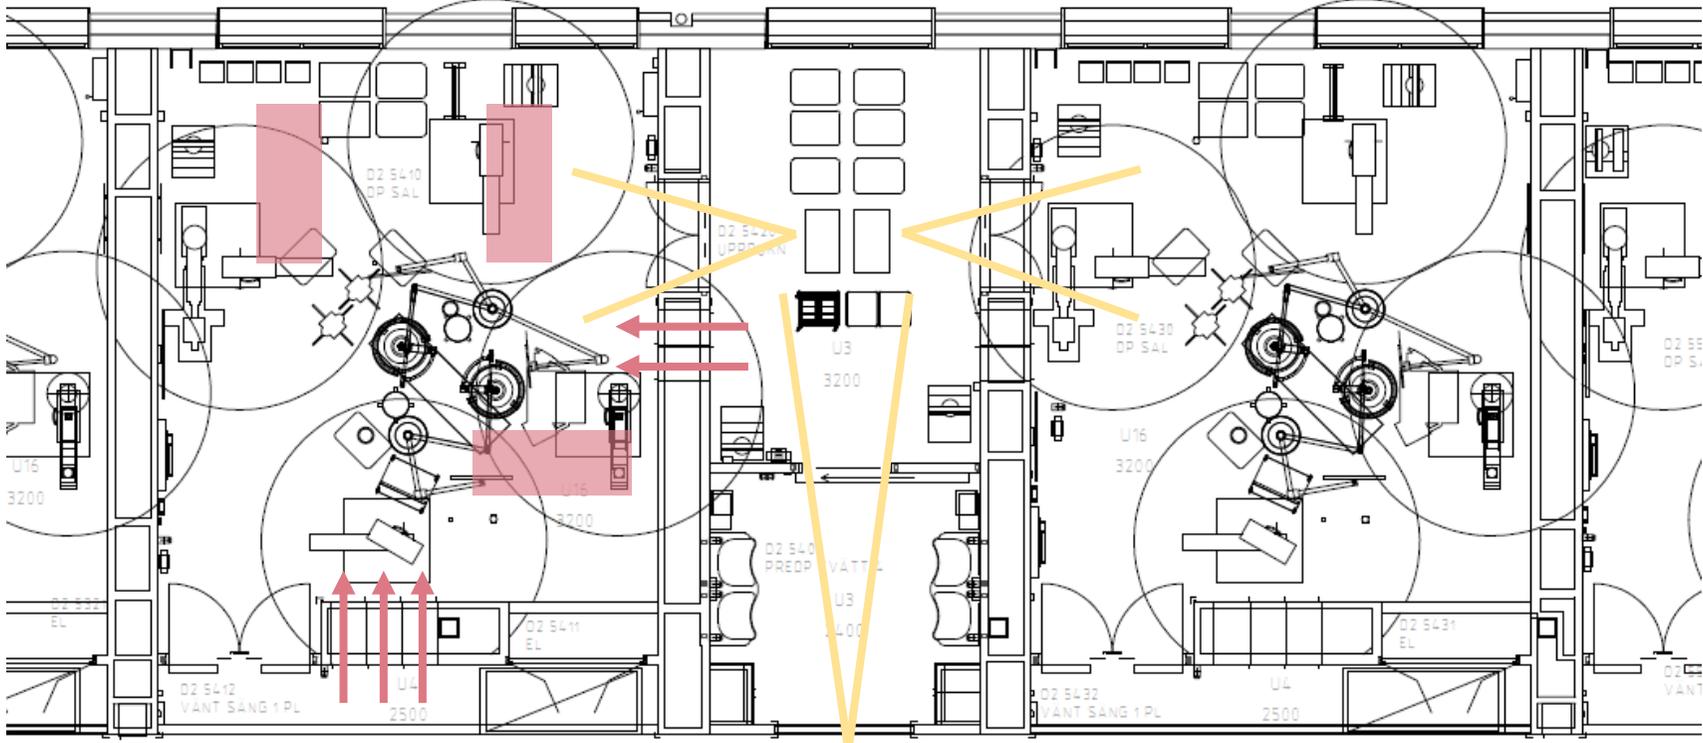

44 PrepostOP
